Education

Ph.D. in Artificial Intelligence and Robotics

The University of Texas at Austin, TX, USA

Affiliation: *Peter Stone, Learning Agents Research Group*

Aug 2018 – Dec 2023

Thesis: Aligning Robot Navigation Behaviors with Human Intentions and Preferences

Research Areas: Reinforcement Learning, Computer Vision, Self-Supervised Learning, Imitation Learning

Relevant Courses: Machine Learning, Reinforcement Learning, Autonomous Robots, Deep Learning

M.S. in Robotics

Texas A&M University, TX, USA

Affiliation: *Robert Skelton, Tensegrity Research Group*

Aug 2016 – July 2018

Research Areas: Computer Vision, Robotics, State Estimation, Control

Relevant Courses: Probabilistic Robotics, Computer Vision, State Estimation, Artificial Intelligence

B.Tech. in Instrumentation and Control Engineering

National Institute of Technology, Trichy, India

Affiliation: *Robotics and Machine Intelligence Club*

June 2012 – July 2016

Relevant Courses: Data Structures and Algorithms, Neural Networks, Pattern Recognition

Work Experience

The University of Texas at Austin

Aug 2019 – Present

Graduate Research Assistant

Austin, TX, USA

- Designed state-of-the-art **sim-to-real** algorithms for the NAO humanoid soccer robots, enabling fast and robust walking on bumpy surfaces using **reinforcement learning**, significantly improving safety. [\[Video\]](#)
- Developed efficient **imitation learning** algorithms for learning from expert demonstrations on physical hardware, addressing egocentric viewpoint and embodiment mismatch between agents. [\[Video\]](#)
- Designed a **self-supervised representation learning** method for preference-aligned off-road navigation, enabling the Spot robot to autonomously hike a 3-mile trail successfully in Austin, Texas. [\[Video\]](#)
- Curated and published a large-scale **dataset** of demonstrations for socially-compliant robot navigation. Designed **inverse reinforcement learning** techniques to learn reward functions for navigation. [\[Dataset\]](#)
- Extended learned inverse-dynamics models with egocentric vision-based onboard sensing to improve the accuracy of **mobile robots navigating at high speeds** of 4m/s. [\[Video\]](#)
- Mentored** undergraduate students with their research, and **collaborated** with faculty and other graduate students on research topics spanning reinforcement learning, imitation learning, and robotics.

Amazon Robotics (Amazon Scout)

May – Aug 2019/2021

Applied Scientist Intern

Seattle, WA, USA

- Developed a novel **generative adversarial algorithm** for monocular **visual localization** on sidewalks, resulting in 30% improved accuracy, compared to an existing classical visual localization pipeline. Filed and **published a patent** at USPTO, highlighting innovative aspects of the approach. [\[Patent\]](#)[\[News Coverage\]](#)
- Improved localization accuracy by 32% through **contrastive visual representation learning** for weather and lighting invariant coarse visual localization. Deployed the learned model on the Scout robot, integrating it with the existing C++ stack for real-world deployment.
- Implemented **deep learning-based keypoint features**, achieving over 55% improvement in fine pose estimation accuracy in unstructured outdoor environments while maintaining a real-time inference rate.

Texas A&M University

Aug 2016 – July 2018

Graduate Research Assistant

College Station, TX, USA

- Conducted research on various topics including (1) Vision-based tracking of tensegrity robots, (2) Simulating non-linear dynamics of tensegrity robots through physics-based first-principles modeling, (3) Optimal shape control of tensegrity robots on real hardware (master's thesis). [\[Video\]](#)

Robot Competitions

RoboCup Domestic Standard Platform League

Team: AustinVilla@Home

Summer 2019/20/21

Austin, TX, USA

- Participated in RoboCup 2019-2022 representing AustinVilla@Home in DSPL and **won third place internationally**, placing **first among North American teams** at RoboCup 2021. [\[Paper\]](#) [\[Video\]](#)
- Implemented “take out the trash” task to perform autonomous cleanup of an indoor environment by the HSR robot. [\[Video\]](#)
- Built a synthetic data generation pipeline to train object detection and segmentation networks on YCB RoboCup objects.

Teaching

Teaching Assistant

Intro to Programming and Numerical Optimization

Fall 2018, Spring 2019

Technical skills

Programming Languages

Python, C++

Libraries

PyTorch, PyTorch-Lightning, OpenCV, Scikit-learn, Numpy

Softwares

Git, Docker, TensorBoard, MuJoCo, ROS, COLMAP, RViz, \LaTeX

Publications

Journals (RA-L, Machine Learning)

- **Haresh Karnan**, Anirudh Nair, Xuesu Xiao, Garrett Warnell, Soeren Pirk, Alexander Toshev, Justin Hart, Joydeep Biswas, Peter Stone. “Socially Compliant Navigation Dataset (SCAND): A Large-Scale Dataset of Demonstrations for Social Navigation”, *Robotics and Automation Letters*, (RA-L 2022).
- Josiah Hanna, **Haresh Karnan**, Siddharth Desai, Garrett Warnell, Peter Stone. “Grounded action transformation for sim-to-real reinforcement learning”, *Springer, Machine Learning*, 2021.

Conference Proceedings (NeurIPS, CoRL, ICRA, IROS)

- **Haresh Karnan**, Elvin Yang, Daniel Farkash, Garrett Warnell, Joydeep Biswas, Peter Stone. “Self-Supervised Terrain Representation Learning from Unconstrained Robot Experience”, *Conference on Robot Learning (CoRL 2023)*.

Master’s Thesis

- “Design and Control of a Tensegrity Prism Manipulator”, Texas A&M University College Station, July 2018.

Invited Talks

- “Learned Locomotion for Mobile Robots: Addressing Dynamics Mismatch and Utilizing Demonstrations”, Google Research, June 2022.
- “Aligning Robot Navigation Behaviors with Human Preferences”, Bosch AI Research, July 2023.
- “Enabling Self-Sufficient Robot Learning for Real-World Locomotion”, Sony AI Research, August 2023.

Service

Reviewer	AAAI, RA-L, NeurIPS, ICRA, IROS, CVPR, ICML, HRI, AI-HRI.
Program Committee	IRMAS, SAC '24.
